

**The Art Institute of Chicago / Engaging Collections in 3D
Program Evaluation: Diwali Family Festival
Instrument 4: Visitor Interview (Ryan Education Center)**

Protocol

Identify families that took part in the full 3D scanning experience in the gallery. Ask them to join you for a few minutes for an informal, anonymous, painless interview about their experience. Take them to Crown Educator Resource Center. Use one interview sheet per family. Take detailed notes; use backside/margins if necessary.

Interview

1. How long did you spend on the 3D scanning/printing activity? Is this amount the same amount of time you usually spend at Art Institute family programs? If shorter, why? If longer, why?
2. Who did you work with to scan/print artwork today? Can you describe the collaboration—who did what, what roles did you all play? In what ways was the collaboration successful or not?
3. What can you tell me about the pose you struck (or observed) today for your scan? What artwork were you (or the poser) modeling? Can you describe the pose and the original artwork?
4. What can you tell me about the scan you (or the others) created today? How would you describe it (as original work, as compared to the person who posed, as compared to the source artwork, and other)?
5. What can you tell me about the 3D objects you watched being made today (or the examples made on other days)? How would you describe them?
6. Did you meet with Tom Burtonwood? How would you describe his work?

7. In what way did the experience of 3D scanning/printing add to your visit today? Now that you've seen 3D printed objects based on the collection, do you have new thoughts about or new views on the collection?

8. Which aspects of today's program do you feel had the biggest impact [were most memorable, did you enjoy most, bothered you, other] on you today? Having a teaching artist? Collaborating with family and strangers? Being in the gallery? Other?
